This fine piece of land is a delightful spot for a home. You will find it almost next to where lots are selling for \$2200 each, which is the best recommendation for these that we could call your attention to. Here you can have a lot for \$225 and upwards, with trees, vines, etc. You will have to call early, for the prices are so reasonable that we will not have enough to go around. The streets will be graded and lined with pepper trees, and plank sidewaiks added. Do not purchase anywhere a lot before you see these, if you wish a live bargain. They speak for theurselves. Always in from 9 to 12 a.m., and will take you out at 2 p m. with pleasure.

An important meeting of property J E Lovely, Mrs F McConkey, Miss R Wurray, J S Miranditte, JE Lovely, Mrs J E Lovely, Mrs F McConkey, Miss Brown, Mrs C Mahon. wners on Buena Vista street was held i the Council Chamber last night, in eference to getting a bridge. The meeting was called to order by James Velsin ing was called to order by James Veisir, and J. F. Holbrook was elected chairman.

Mr. Veisir explained that the object of the meeting was to get securities for the amount subscribed towards building the Buena Vista street bridge, and stated that as soon as the securities were put up the Council would go ahead.

Ex-Councilman Hamilton favored the building of the bridge. Lots on the east side on Hoff street, bow worth only \$250.

building of the bridge. Lots on the east side, on Hoff street, now worth only \$250, would be advanced to \$1000.

Mr. Greenewalt said the proposed bridge will cost \$32,000.

G. W. Morgan said the Council was working in the dark. The City Engineer should furnish an estimate of the cost.

Mr. Holbrook gave the cost as follows: piers, \$6000; bridge, \$13,960; approaches, say, \$1000; total, \$21,960.

Mr. Morgan favored the appointment of a committee to consult an engineer and get an estimate of the cost.

Mr. Holbrook said that Mr. Eaton had been misjudged. He is now at work on the estimates. The work has been retarded. Some councilmen think there is a job in it.

a job in it.

Mr. Hamilton said the same question

Mr. Hamilton said the same question was agitated a few years ago, and estimates of the cost of a bridge over the river on Buena Vista street were secured, ranging from \$6000 to \$19,000. The best way is for the Council to get what money it can from clizens, and put up the balance to build the bridge.

Mr. Holbrook said the Council would

Mr. Holbrook said the Council would never consent unless it was done under the City Surveyor. There is the amount of \$7500 pledged. If this is secured the Council will build the bridge. E. H. Dunpigan moved that Measrs. Greenewalt, Brodrick and Schroeder be appointed a committee to secure the certified checks or notes for sixty days of the subscribers and present them to the Council, and that Mr. Velsir secure the certified ohecks of the Southern Pacific and Los Angeles & San Gabriel Valley Bailroad Companies. Carried.

The meeting then adjourned.

so neat and so timely, that they rise like a grateful incense and envelop one in a grateful incense and envelop one in a cloud of satisfaction. Such a compliment the Times has just received in the naming of a brand of cigars by M. A. Newmark & Co., of this city. They are choice cigars (that goes without saying), a little to the black (Republican), strong (of course), but withal well flavored, and with just enough mugwump in them to make a delicious smoke. A box of the me brand was sent to this office yesterday, with the compliments of Newmark & Co., for which they will please accept the thanks of the smoking staff.

Catarrh is often regarded by the patient as cold in the head, and it no often expresses his astonishmont at his remarkable tendency to contrain a fresh cold; iedeed, he declares that he is accreedly free rom one cold before the takes another, and yet he is always exceedingly careful. It is also a matter of supprise to him that the cold always seems to settle in the head and throat.

At times many of the symptoms of catarrh may seem to abate, and the patient is led to hope that the disease, it is somewhat changed in character, and has extended to the throat. A sense of weariness is sometimes foil in reading, speaking or singing; hoarseness at times occurs; a sensation of dryness is felt in the throat, or it appears that some foreign substance, as for instance a hair, obstructed the throat; there becomes a sense of languor and fatigue, breath lessens upon a little exercition, shout, hacking cough, a peculiar sound in clearing the throat, a feeling as though three were not room enough in the chest to breathe—these and other symptoms occur after the disease has made considerable progress. Then it is at time when consumption is about to begin its dreadful work. Up to thi time the progress of the disease may have been slow, and the patient may, in expressing bis confidents hope that it will "wear off," declare that he has had the catarrh for years and has not seemed to become much worse, and trusts that he will be another the search for years and has not seemed to become much worse, and trusts that he will be another the search for years and has not seemed to become much worse, and trusts that he will be another throat because that he has had the catarrh for years and has not seemed to become much worse, and trusts that he will be another the search for years and has not seemed to be and the patient may, in expressing his confidents the patient may, in expressing his confidents the patient may, in expressing his confidents the patient may in expressing his confidents the patient may in expressing his confidents the p

patient may, in expressing his confident hope that it will "wear off," declare that he has he do the color he for years and has not seemed to become much worse, and trusts that he will by and by recover; but this delusion is the graud error that has peopled our cameters with consumptive forms.

Republican Meeting

Republican Meeting

Hon. John F. Swift

Republican Nominee for Governor, will address the people on the issues of the gaster of the seem invaded by the destroyer—acarcely a family in our northern climate whose circle has not been invaded by the destroyer—acarcely a home wharin some loved one has not felt its blight, and either passel sway from earth or is wasting to-day and seeming the hopeless victim of this terrible disease.

The symptoms of the first stage of consumption are various. The following are promisent, and wherever any of them exists a thorough examination should siways be made, with a view to arree ting the disease, if shown to axist. There is usually a sense of westiness upon little exercise, a disposition to that the content has people on the issues of the case of the same of the case of the c

made, with a view to arre-ting the disease, is shown to exist. There is usually a sense of weariness upon little exercise. a siposition to remain passive and idle, debpondency of rutines from no apparent cause, a peculiar sensitiveness to the effect of cold, and breathlessness as upon moving, or descending a hill or stairs, a slight hacking cough withor without expectoration, excitability upon slight constions, flying pains through the chest or back or under the shoulder blades. The symptims are more noticeable toward or during the night, slight fever in the afternoon, cold feet and hands, or in many cases a blue lividity of the lips and roots of the finger nails.

Probably no discovery or improvement in medical practice of late years has been of more utility than that which is properly hnown as the "inbalation system of cure" in threat and lung diseases. In this climate, where at least one in every three persons in the entire community is afflict d with ome form of fareat or lung diseases, snything which really lends to arrest the disease and restore the sufferer from its ravages is surely a blessing which will be appreciated by every family throughout the country. Its results are most gratifying and remarkable, and have elicited the very highest commendation from many of our best citizens. If convey, the remedy directly to the parts diseased. Its effects are prompt and cream usent. Its action is always perfectly eafe and saiutary, even in the most debilitated cases. Belief is usually obtained from the first hour of using the remedies. The treatment is both loos! and constitutional, and yet the cure are effected without much medicine.

Lea Piers be no delay then in application to the treatment that has stood the test and has proved again and ogain the only hope—the only reliable safegaard and means or restoration.

storation
Our kastern friends should not depend upon climatic influences alone, for herein lies the fatal mistate Nearly every case requires positive medication, so as to become rid of the offending matter, the consolidated portions of the lungs—thereby giving nature an opportunity to heal them.
